February 16, 2011

Joshua Robinson

After consultation with your oral examination committee, and per the graduate handbook rules of NERHP, faculty of NERHP have voted on your status. The majority agreed that you have passed your oral examination and have therefore passed the Qualifying Examination. Consequently, the next steps for your progression through our PhD program are to be as follows:

1. You must now constitute your graduate committee and file a new program of study by the end of the winter quarter, 2011 in order to progress in the program.
2. You will need to determine an area of scientific investigation commensurate with the experience and interests of your new advisor and committee.

If you have any questions regarding the decision of the faculty or the above instructions, you may contact my office for clarification.

Sincerely,

Kathryn A. Higley, PhD, CHP  
Professor and Head  
Dept. of Nuclear Engineering & Radiation Health Physics  
100 Radiation Center, Oregon State University Corvallis, OR 97331-5902
